

Existing view from Station Road (B4385)

Photomontage view of the Proposed Care Home from Station Road (B4385)

**Notes:**

Whilst every effort has been made to ensure the photomontage is correct in terms of scale, position and likeness to the final development, photomontage views are only ever intended as an illustration of how a development might look based on the information available.

- 3D model of the Proposed Care Home created using plans and elevations provided by Munro Associates (366 PLANS AND ELEVATIONS PLANNING.dwg)
- 3D model "camera matched" in 3ds MAX to the photograph using points of reference identified on the site survey provided by Munro Associates (366 SITE PLAN AS EXISTING.dwg)
- A digital camera with a 50mm equivalent\* lens was used for all of the photographs (\* equivalent to a 50mm lens on a traditional 35mm film camera). Photographs were then spliced to form the panoramic views

(Revision A - changes to roof - May 2010)
